# Contest environment issues

- **Atom**

- fix deployed for clang
- linting: **no solution found**

- **Problem with the keyboard layout and VSCode**

- use `setxkbmap` (see “Technical precisions” on the SWERC landing page, first bookmark in browsers)

- **Crashes when using up all RAM**

- we have disabled the swap on all machines to encourage the OOM to run earlier
- we have added a `ulimit` directive
- still, please don't do that :)

# Contest environment issues

- **OCaml plugin for VSCode**

- OCaml plugin by hackwaly is deprecated
- vscode-reasonml plugin by reasonml-editor is deprecated
- reason-vscode plugin by Jared Forsyth does not seem to work (we run into problems described in open issues)
- **no solution found**

- **Software requests (gnome-tweak, calculators...)**

- we have installed `gnome-calculator`
- we have **not** installed `gnome-tweaks`

- **Issues when switching between windows in the WM within a group**

- use `alt-`` (backtick, top left of keyboard)
